FEATURE | FUNCTION | BENEFIT

BUMPER PULL HORSE TRAILER | MODEL 9651

FEATURE	FUNCTION	BENEFIT
Aluminum Construction	Featherlites are made with an all-aluminum frame and skin.	With just routine maintenance, aluminum construction has higher resistance to rust and corrosion and in the long run, they hold their value longer. It's also lighter weight, increasing your payload capacity and making for a smoother tow.
Uni-Body Design	All components of the Featherlite trailer from side posts to roof rails to roof bows to cross members are engineered into a uni-body design.	The uni-body design makes the trailer stronger and more durable for the long haul. It also gives you the smoothest pull possible.
Aluminum Running Boards	The running boards feature a full-length, one-piece design with a rear taper and aluminum huck bolts.	The running boards have a consistently wide platform over the length of the trailer. They are durable and hold up to repeated use in the toughest of conditions. The aluminum huck bolts reduce corrosion.
3/4" Rubber Floor Mats	3/4" rubber floor mats are standard in the horse area.	The thickness of Featherlite's floor mats give horses the greatest amount of comfort and stability during travel, reducing stress and potential injury to the horse.
Slam Latch Dividers	Slant stall dividers with spring-loaded slam latch are standard.	Featherlite's patented spring-loaded slam latch dividers offer a quick and secure lock, with no need for hands near the fastening point. With the dividers properly secured, they won't swing about while traveling, potentially injuring your horse.
